

## Press Announcement 2011

### **R H Hall Acquires Fabrication Business**

On the 12<sup>th</sup> of May 2011, leading foodservice equipment supplier, R H Hall, completed the successful acquisition of MBM Fabrications Ltd, based in Berkhamsted, Hertfordshire.

The MBM Fabrications business has traded for over 61 years and built up a very good reputation within its industry. With an impeccable service record, built upon integrity and trust, it has forged many great relationships with clients and suppliers alike, including R H Hall.

“Our own business has been built upon providing innovative solutions and our needs for fabrication and metal work services has grown significantly, so much so, that we reached a point where we needed to have a greater degree of supplier integration. Having worked very successfully with this local sheet metal fabrication company for the past 15 years, we entered into discussions regarding an acquisition which came to fruition in May 2011.” Says **Ray Hall, Managing Director of RH Hall.**

“Together we are now able to offer our partners (clients and customers) a complete and extremely comprehensive Foodservice equipment product offering and a fabrication/metal work/production service.”

The new acquisition will be known as “**R H Hall Fabrication Services**” and will operate as a division of R H Hall. It will be headed up by Geoff Murray who has spent 40 plus years in the fabrication business. All staff and management are retained in order to maintain full continuity of service for existing and many longer-term customers.

### **Our British Factory**

R H Hall Fabrication Services is based in a modern, fully equipped 15,000 square foot factory in Berkhamsted, only five miles from the 23,000 square foot corporate UK head office of R H Hall.

**Ray Hall** further comments, "We work with all mild steel, stainless steel and aluminium, offering a complete metalwork and product consultation service. The 10 strong Fabrication division team managed by Geoff Murray, Brian McCann and the shop floor led by John Lancashire boasts many years of experience in the production of all forms of metal work fabrication."

"With this wealth of experience brings the love of new challenges and all projects whether small or prototype to full product roll out are welcomed' concludes **Ray Hall**.

The factory is fully equipped with NC control press brakes, guillotines, spot welding, tig and mig welding, metal finishing bays, powder coating booths and ovens.

### **Design**

Behind the scenes is an in house CAD/CAM department that is available to design products from customer specification and transfer the detail directly to the production floor for CNC hole piercing and modern laser cutting.

### **Samples & Prototypes**

Attention to detail and customer satisfaction is paramount to every fabrication project that we take on, so we provide a complete Prototype service, prior to entering into full production.

### **Production**

Once a production order has been assigned, John Lancashire, the Works Manager, will oversee the order from flat sheets through guillotining, laser cutting, bending, welding, spraying, QC and packing to final dispatch.

### **Assembly & QA**

We have a dedicated department for final assembly, machine build and important Quality control.

### **Storage / logistics**

We have good storage capacity and able to offer this facility service to store and despatch your product requirements to meet logistical needs.

## Partnership

**Ray Hall, Managing Director** says, "Our customers are thought of as a partner rather than a customer. We consider that our partners' product is an invaluable resource. It is a well-known fact that customers buy with their eyes.

We understand this and have the expertise, experience and facility to create cabinets and structures that will have a lasting impression, ensuring that the product has the best chance to succeed in the market place."

"We believe in working very closely with our partners and using our extensive experience in the Foodservice market place we will always work to achieve 100% satisfaction for our partners".
