

Food Solutions & Innovations

Welcome to R H Hall Foodservice Solutions and Innovations, a creative and dynamic division formed in 2009, to provide bespoke and tailored equipment for any foodservice brand, concept, menu or operational need. By listening to the needs and desires of our foodservice customers, we can take a standard 'off the shelf' kitchen product and make changes to suit any environment. Working together we can create bespoke solutions which include any number of creative options - from new corporate branding, to specific automated cooking functions, to linking equipment with e-reporting systems - put simply, we can change the design and build of any foodservice equipment to suit your individual requirements and operational needs.

With access to the most extensive range of foodservice equipment available on the market today, together with our vast knowledge and experience within this sector, this makes us ideally placed to offer this specialised service. Working in partnership with your own business and market expertise, we can create the perfect recipe for your business success.

Our dedicated Food Solutions team work from our in house, state of the art development kitchen and can work closely with chefs to create new menus, adapt recipes and create perfect equipment timings to enhance cooking results.

Partnering this with our UK based Fabrications Division, we are able to take on even the biggest challenges - from concept, to design, to complete roll out of the finished product.

Day to day operational peace of mind is offered through the R H Hall nationwide network of approved distributors, so no matter where your business is, there will be a distributor nearby to offer you extensive and reliable after sales service, supported by our knowledgeable in house Customer Service team.

The next few pages show just a few examples of how our creative solutions have been successfully employed by a number of major foodservice chains and operators.
