

PROFESSIONAL ICE MACHINES

Distinctive affordable solutions with premium quality

Introducing Smeg's new range of professional ice machines, available in 3 versions - producing full cube, hollow cube or flaked ice. Designed for use in bars, restaurants and other commercial environments. They are characterised by their performance, reliability and ease of installation. Built in Italy using the best quality materials and most advanced technologies this comprehensive range will suit all your ice making needs.

- Constructed in AISI 304 Stainless Steel
- Recessed door for better access to the internal ice storage chamber
- Unique paddle or spray system used to form ice with a patented friction device on the paddle shaft to optimise the production cycle (on selected models)
- Thermoformed plastic ice storage chamber with high density polyurethane foam insulation
- Backlit On/Off switch placed on the front panel of the machine
- Easily accessible refrigeration unit located at the base of the machine
- Air cooled system
- Refrigerant gas used: R404a CFC-free
- Gravity drain

Full Ice Cube - 5 different models available with a maximum daily production of ice ranging from 23-77kg

Hollow Ice Cube - 5 different models available with a maximum daily production of ice ranging from 25-80kg

Flaked Ice - 3 different models available with a maximum daily production of ice ranging from 60-150kg
