The New R1900M Sharp "Dual Control" – Ergonomic, Fast and Eco Friendly at the touch of a button

Designed with incredible flexibility in mind the new **Sharp R1900M "Dual Control"** is a must for heavy duty use. With its 1900 watt power this is a very fast microwave that has an "extra heavy duty build quality", but still runs off a standard 13 amp plug, has two control panels and is capable of programming up to 100 menus.

Why "**Dual Control**"? When stacking ovens there is always the danger that operators are over reaching to operate the controls. With the **Sharp R1900M "Dual Control"** this is no longer an issue. These ovens can be stacked up to two units high with controls in easy reach of the operator, saving crucial space without compromising safety.

Unique features include three internal fans as opposed to competitor's that use a maximum of two fans. The additional fan removes steam and heat from the cavity, prolonging the life of the machine.

The "**Express Defrost**" technology, built into these ovens, automatically speeds up the defrost process.

The "**4-Stage**" cooking ability allows total control and flexibility, allowing even the most delicate items to be cooked to perfection.

Add to this the ability to control double and triple quantities at the touch of a button and you have the most versatile oven yet!
