

Buying Guide

By combining the specialist skills of our own Fabrications business with our exclusive distributorship of Simply Stainless 'off the shelf' fabrication systems we created a Bespoke Solutions Division, which enables us to offer our customers unparalleled expertise within tailored fabrications.

The division provides a bespoke design and planning service that brings even more creative, cost effective fabricated solutions to the market and, since its creation in 2011, has gone from strength to strength, with a full team of dedicated experienced professionals behind it and a manufacturing capability that's based here in the UK. Bespoke tailor made requirements can be designed and built or simply adapted from the Simply Stainless off the shelf offering to suit every commercial need, with minimum lead times.

Factory Manager, Adam Hall, heads up the service and is a key link between the internal team, the factory and our customers. His understanding of the market, fabrications and project management skills have brought many solutions to reality. Also, behind the scenes is the in house CAD/CAM department that is available to design products directly from customers' specifications.

Considerable investment has been made into the 15,000 square foot fabrications factory to modernise the manufacturing process, to now offer a complete metal work and product consultation service, working with all mild steel, stainless steel and aluminium from 0.7mm to 3.0mm thick. British Steel and British components are used wherever feasible, to ensure quality and consistency and structures that will last the test of time. Certified to ISO 9001 quality assurance and government stamped as an approved and certified supplier to any Public sector organisation and buying groups.

The Simply Stainless 'off the shelf' range of modular fabrication is a fantastic solution where speed is of the essence, as the range is available from us on a next working day basis throughout the UK. This easy to assemble system can be extended at any time, creating a bespoke result. The range encompasses everyday essentials, such as Wall Benches, Sinks and Wall Shelves, all available in sizes from 600mm to 2400mm. It also includes more specialised items such as dishwasher outlet/inlet tabling, events tables and food service trolleys. The range is completed with a large choice of add on accessories – chef's drawers, leg braces, over and under shelves.

All units are precision engineered, marked by the highest quality tig welding of joints and their professional finish. Fully welded sinks have gauge thickness uniformity and 3mm backing on bench tops delivers the strongest modular bench on the market. The products are all manufactured from high-grade stainless steel and amply pass the 'knock-test' and 'stability test' - two ways of really benchmarking the true quality of a modular benching/tabling system. Such is the confidence in the products that all the range comes with a no quibble lifetime warranty.

The fabrication options available from the Bespoke Division are endless. Combine the highest standard of finish, competitive pricing and fast turnaround for large bespoke projects and we have one of the best bespoke performances available on the market. No long waiting times for overseas deliveries. And you can visit our UK factory to discuss your requirements first hand with the team.

For more details, please visit www.rhallfabrications.com or www.simplystainless.com, where you can also use the Kitchen Designer tool to create your very own perfect kitchen! You can also view videos on the benefits and easy assembly of the Simply Stainless range at www.youtube.com/user/rhallcatering

Advantages & Key Benefits

- Modular systems offer versatility and mobility – ideal for ever changing kitchens.
- A wide range of accessories offer huge versatility to suit any user.
- Bespoke sizes of stainless steel tabling and shelving can be catered for via the RH Hall fabrications division, so tricky kitchen layouts aren't a problem.

Buying Tips

- **What equipment?** – Look for a range that is easy to install and has optional extras so you can add on or change if required. Consider the bespoke route which may overcome tricky layouts or prove to be a more flexible and cost effective option. Choose designs that will minimise dirt traps.
- **Build quality and reliability** – When choosing tabling and shelving, look for a top quality high grade stainless steel finish – check the depth of worktops – do they pass the 'knock' test? Check the availability and cost of spare parts and the after sales service, plus any warranty periods. The Simply Stainless range comes with a lifetime warranty.
- **Operational features** – For modular systems, check how easy they are to assemble and their strength and stability once built. Look for fully welded sinks and tubular legs for strength and ease of cleaning.
