

Buying Guide

The importance of keeping your establishment or operation clean is obvious... on the surface! But doing it effectively can have its challenges. And in terms of removing allergens, germs and pollutants that we can't see, the job becomes even more of a test. Exceptional cleaning performance from versatile machines designed to work in any commercial environment are what is required.

Powerful commercial vacuum cleaners with a high level of suction will pick-up dust and dirt, however in some environments such as foodservice and healthcare, it is essential to stop the smaller particles of dust and allergens re-entering the air and vacuums developed with HEPA filters inside will help eradicate this. A vacuum with a proper HEPA filter will channel virtually all of the dirty airstream through the filter, if it doesn't, it's simply rearranging dirt! A genuine HEPA filter is much more hygienic than an ordinary one because it will stop mold spores and even some bacteria and viruses.

When vacuuming alone is not enough to remove dirt and stains from carpets, then carpet washers are the answer, these machines can spot wash, everyday wash or deep clean lifting stains you can and can't see in the pile. And for hard floors and surfaces that need a hygienic clean and sanitisation, steam cleaners can do the job without the need for chemicals.

Advantages

- Some vacuum models have advanced filtration and energy efficiency for a better performance and more effective clean.
- Lightweight models of vacuum available for ease of portability and models with lower noise levels for quiet operation, allowing the vacuums to be used almost anywhere.
- Steam cleaners can be extremely versatile, not just cleaning floors, but cleaning taps, tiles, windows and any hard surface and can switch from steam cleaning to extraction of liquids.

Buying Tips

- **What equipment?** - Look at the surface area and the types of surfaces to be cleaned (hard floor or carpet) to determine the capacity and style of vacuum - i.e. upright or cylinder model. Similarly for carpet washers to ascertain capacity required and consider whether it is for spot washing and removing stains or whether a larger capacity model would be best for deep cleaning. If there is an extensive area of hard surfaces to clean and hygienically, as in healthcare environments, choose a steam cleaner.
- **Build quality and reliability** - Look for sturdy and durable manufacture, reliable, energy efficient models with exceptional operational productivity. Choose a leading brand known for its cleaning equipment and genuine HEPA filters, they are worth the investment. Look at after sales service and check the availability of spare parts and any useful accessories, plus the cost of replacements features. Go for lightweight, yet stable models for easier mobility. Check the warranty periods.
- **Operational features** - On vacuum cleaners, look for: A-rated, HEPA filtration to reduce airborne particles and produce an outstanding cleaning performance; anti-topple stability; long, high visibility cables; variety of on-board tools; quiet operation; carpet and hard floor cleaning capability and dust bag capacity. On carpet washers, look for: large capacity tanks; time saving multi-directional cleaning; excellent extraction to ensure carpets dry quickly; on-board tools, including agitating wash tool brushes and hose. On steam cleaners, look for: quick heat up and continuous steam; variable steam control; extensive set of tools for cleaning a wide range of appliances and surfaces.

Key to icons

- LD** **Light Duty**
Designed for commercial use in a less busy environment
- MD** **Medium Duty**
Strongly constructed to perform in a busy situation
- HD** **Heavy Duty**
High standard of build to provide good service under heavy use
- HD+** **Extra Heavy Duty**
High powered, fast throughput with the highest standard of build
- 13 Amp**
Plug and go!
- Hardwired**
Hard wiring required
- Gas**
- SS** **Stainless Steel Construction**
- 1 YEAR WARRANTY** **Warranty**

Commercial Cleaning

VCST01

vax COMMERCIAL

- Steam cleans, vacuums and sucks up wet spills
- 1200W motor
- 1700W heater
- External Dimensions: 550 W 395 D 505 H
- Workshop Warranty

VCW04

vax COMMERCIAL

- 900W motor
- Wide 28.5cm cleaning path
- Clean Surge™ for stubborn stains
- External Dimensions: 290 W 500 D 1150 H
- Workshop Warranty

VCC10

vax COMMERCIAL

Rated C overall for energy consumption, the VCC10 has an excellent pick up - rated C on carpets and A on hard floors - so you'll remove even more dirt as you clean. It's also ultra-lightweight at just 4.5kg, yet has excellent stability, so it won't topple if it's quickly pulled around corners or furniture. With a long, high-vis power cable so you can keep cleaning without unplugging. The VCC10 is ideal for cleaning small to medium areas.

- 1200W motor
- Cylinder
- External Dimensions: 350 W 340 D 370 H
- 9 litre bag capacity
- Powerful suction - 200 air watts
- Workshop Warranty

VCW02

vax COMMERCIAL

Lightweight and portable with on-board tools for one-handed carrying, the VCW02 carpet washer from Vax Commercial is perfect for picking up spills and removing tough stains. Agitating wash tool brushes and carpet cleaning solution break down and remove stubborn dirt, leaving carpets spot-free and rooms smelling fresh.

- 350W motor
- 1.7 litre clean water capacity
- External Dimensions: 320 W 250 D 440 H
- Portable and lightweight carpet washer
- 1 litre dirty water capacity
- Workshop Warranty

VCSD01

vax COMMERCIAL

- Mains powered
- 400W vacuum motor
- 370W brush motor
- External Dimensions: 800 W 560 D 790 H
- Workshop Warranty

VCSD02

vax COMMERCIAL

- Battery powered
- 250W vacuum motor
- 250W brush motor
- External Dimensions: 800 W 560 D 790 H
- Workshop Warranty
