

Domestic Appliances

To complement our extensive range of commercial foodservice equipment, we have put together a comprehensive range of domestic appliances, all from top brand manufacturers. These appliances are ideally suited to non-professional catering applications - for example use in proprietor accommodation, staff rooms and student accommodation - where heavy duty equipment is not always necessary.

The brands that we have selected all have a reputation for high quality and reliability, are always looking to improve their product offering and have many years of experience behind them. We are able to offer Built In, Integrated and Freestanding appliances, with a wide range of products available, including: Microwaves, Ovens, Hobs, Extraction, Dishwashers, Laundry, Refrigeration and much more...

Choosing the right equipment

As with choosing any equipment, consider your current and future needs - what volumes do you expect the appliance to cope with and how often? How much space is available? Do you require built in or freestanding appliances?

Are you working to an overall design theme, or is functionality the priority? What budget is available?

Always be clear and realistic on your specific needs.

Take a close look at the build quality - don't be fooled by the host of cheaper imports available. Always choose a leading brand as they will have established a good reputation for quality, reliability and genuine service back up, plus availability of spare parts. Domestic appliances don't need to withstand the same rigours as commercial equipment, but nevertheless you get what you pay for and it is well worth investing in the top brand names for peace of mind.

Our Sales Team are able to advise on the latest options available from each manufacturer and provide a quote to meet your needs. Builders and contract packs are also available on request.

For any domestic requirements, call the Sales Team on 01296 663400 or email sales@rhhall.com

SHARP Panasonic

Our vast knowledge of microwave technology does not exclude Domestic models. With outputs of 800W to 1000W available, we have both standard microwave only and combination microwave models available.
