

iWave Foodservice Solutions

Introducing iWave® your 24/7 foodservice partner

iWave® from Maestrowave is the intelligent solution for every foodservice situation where speed, quality, consistency, accountability and safe cooking are required.

The system will meet any foodservice demands from the smallest operator to the largest chain or restaurant.

- A fully automated foodservice solution suitable for fresh, frozen and ambient foods.
- Ability to operate 24/7, 365 days a year.
- 100% error proof, consistent and safe.
- Menus can be tailored to any dietary or nutritional needs.
- A table top system which operates off a standard 13amp plug supply.
- Eco friendly – saving of up to 70% over conventional foodservice methods.
- Add ons include automated stock control, cost, profit and carbon footprint e-monitoring.
- The system can be built up and programmed as required then added to at any time to cater for all foodservice demands. The system can also be converted for mobile operation.
- The iWave® mobile system trolley is an example of how flexible and versatile this system can be.
