

SHARP

THE CATERER PRODUCT EXCELLENCE AWARDS 2019 PRIME COOKING EQUIPMENT CATEGORY: SHARP R7500M INVERTER MICROWAVE

The Sharp R7500M Extra Heavy Duty Professional Inverter Microwave enhances the UK's favourite microwave range. Launched in June 2019, this brand new model offers the ultimate in durability, efficiency and reliability.

Inverter technology provides constant and exact power for incredibly uniform results, time after time. As well as ultra fast regeneration times, the R7500M ensures the operator has precision control at all times – making it perfect for defrosting and reheating delicate foods too.

So, what is Inverter Technology?

Inverter technology differs from traditional microwaves by providing constant, rather than pulsed, power when cooking, reheating or defrosting at reduced power levels. For example, a traditional microwave set at 50% will pulse by switching power on and off throughout the cooking period, which can lead to un-even results in some foods. Inverter technology will provide a precise and constant supply of power at 50%, making it easier to cook or reheat foods slowly and defrost dishes to perfection.

Thanks to precise temperature control, you can cook, reheat or defrost a far greater variety of dishes that conventional microwaves were previously not able to prepare to the same high standard.

What are the benefits?

- Precise, fast and controllable power for more uniform cooking
- It consumes less energy, prolonging the lifespan of the microwave
- Lightweight, durable and easy to use

Product Features

- Patented Sharp Inverter Technology
- 1800W output
- 13 amp – Plug & Go
- Large 19 litre capacity
- 14 precise power levels
- 30 memory presets
- Easy to use touch controls
- Clear and easy to read LCD display
- Easy view glass door
- Energy efficient LED cavity light
- Durable stainless steel construction
- Reliable double action handle
- Stackable
- **Full 3 Year On Site Warranty**
